

Alexia Magallanes Donation Fund

A Wish For Vision...

Our daughter Alexia Magallanes is diagnosed with optic nerve hypoplasia (under development of the optic nerve), which has unfortunately left her visually impaired. We are trying to raise money to go to China for her to get umbilical cord stem cell injections which is not available in the United States yet in hopes for her to gain some vision. Our goal is to raise \$60,000. We hope to raise this amount of money by June 2011. We deeply appreciate any contribution you are able to offer!

For more information and successful stories you could visit www.stemcellschina.com.
